RAW WATER STORAGE

Up to 70% cheaper than traditional solutions

Today more than ever, **the effective management and conservation of water** represents **a significant economic challenge**. Easy to deliver to sites and quick to install, **PRONAL** flexible tanks are **the best solution for creating a temporary or long-term water reserve**.

Examples of applications:

- Water storage at living quarters
- Water reserve on construction and utilities sites
- Industrial and agricultural cleaning operations
- Reserves for drilling water storage

Main advantages:

- Low initial investment
- Easy and rapid installation with no planning permission required
- Useful capacity storage with no evaporation
- No maintenance operations

250m³ tank - 20,41m x 10,36m

120m³ tank - 8,88m x 12,52m

DRINKING WATER STORAGE

Installation of a 500m³ within 4 hours

For isolated populations or living quarters, it is often too difficult and costly to get access to infrastructure and network linked to water provide traditional **networks and infrastructures allowing permanent access to a drinking water point**. Practical, economical and designed to meet a range of food compatibility certifications, **PRONAL flexible tanks offer** an experienced tried and tested solution without altering the quality of the water stored.

Examples of applications:

- Drinking water supply at isolated sites
- Storage of drinking water at camps (NGO, army, Public Works)
- Maintenance operations on existing networks
- Permanent storage for remote residential areas

Main advantages:

- Reduced site delivery costs
- A range of drinkability and food compatibility certificates
- Protected from all external contamination
- Qualified to withstand wide temperature variations

5m³ tank - 3,21m x 3,24m

10m³ tank - 4,28m x 4,38m

RAIN WATER COLLECTION

Some tanks have been in service for over 20 years

Economical, ecological and durable, PRONAL flexible tanks, specially designed to adapt to your home, are **the best solution for collecting rain water**. By **reducing your water consumption by up to 50%**, the low initial investment combined with the savings achieved will generate **a good return on investments**. The investment will be paid off within 3 years.

Examples of applications:

- Water supply for home toilets
- Watering of green spaces
- Supply of water to ponds or swimming pools
- Vehicle cleaning

Main advantages:

- Simple and very quick to install
- No earthworks and no planning permit required
- Easy to clean thanks to the watertight closure
- An economical and ecological solution

70m³ tank - 7,40m x 9,63m

2m³ tank - 2,26m x 2,68m

More than **50-years** experience to serve your projects

French company worldwide recognized

ISO 9001 version 2008 certified

Network of more than **90 specialized partners**

Thousands tanks installed over the world

Flexible tanks from **1 to 1000 m³**

10 year guarantee

Integrating **global solutions** (Installation, pumps, treatment...)
